BACK END	PHP, Python/Django, REST/Oauth
DATABASE	MySQL, phpMyAdmin, PostgreSQL
SYSADMIN	Apache, Linux (<i>Ubuntu/CentOS</i>), DNS Management
MISC	WordPress, Git/Github, Google Scripts

PROJECTS

Menu Publishing & Order Retrieval Automation

Client: Kitchen Repose, kitchenrepose.com

Manager: Davis Smith, Director at Uproute Digital, davis@uproutedigital.com, (724) 944 – 8925

I developed a standalone PHP script run as a cron job which automatically updates my client's live site with their weekly rotating menu. This allows my client to set up their menu as far in advance as they like, and eliminates the error-prone tedium of manually updating their live site.

Using a Google Scripts webapp hooked into my client's WordPress ecommerce plugin, I developed a webapp that listens for orders placed on my client's website in real time, and updates a Google Sheets aggregator of my design. My client uses this Google Sheet as a custom dashboard to quickly check how many of each dish they must prepare for the week and where these dishes must be delivered to, without needing to review individual orders through the WordPress admin dashboard.

I also assisted my manager with these adjacent tasks:

- Writing a WordPress plugin to manually update the menu in case the automated script failed.
- Designing a minor update to the client's product database to facilitate usage of the above tools.
- Deploying all deliverables and continuing ongoing maintenance.

WORK HISTORY

Operations Assistant Manager and Head Delivery Bicyclist

Jan 2018 – Current

Manager: Javonne Williams, (206) 849 – 0722

Jimmy Johns Pioneer Square, Seattle WA

Responsibilities include managing the delivery bicyclist staff and assisting the general manager in conducting the store's day-to-day back-end operations. My specialty is in designing & implementing employee-friendly systems with direct business benefits; my most notable example is creating a cash flow audit form that allowed the management team to identify sources of cash shrinkage and maintain a near-zero amount of cash loss.
